

Title: AIRP: AI-based domain-specific business solutions for SMEs

Group: 1 person, Mehmet Eyupoglu

Description: AIRP is designed to simplify ERP solutions for SMEs, countering the common issues of high costs and complexity. With its domain-specific nature, AIRP provides custom solutions through user-friendly ERP modules. These modules cover essential business functions like production, sales & marketing, logistics, CRM, SRM, and sales. Businesses benefit from efficient solutions, leveraging advanced open-source LLM technologies.
